## EDUCATION

**M.S. Human-Computer Interaction**, GPA: 4.0 | DePaul University | *Expected Dec 2026* | *Graduation with Distinction*
**B.A. Filmmaking**, GPA: 3.83, magna cum laude | Columbia College Chicago | 2022 | *Dean's List, 7 Semesters*

## SKILLS & TECH

**Design & Prototyping:** Figma, Axure RP / **Research & Analysis:** Atlas.ti, UX Tweak, SPSS, Excel / **Web:** HTML, CSS, JS

## PROJECTS

**Mosaic – Multimedia Tracking App Capstone** | *UX Research & Design* Jun 2026 - Aug 2026

- Analyzed direct competitors through heuristic evaluation to identify usability patterns, strengths, and opportunities that informed Mosaic's design.
- Developed and refined iterative low- and high-fidelity prototypes in Figma, incorporating research findings to improve onboarding and media-tracking flows.
- Collaborated with a 4-person team to synthesize research findings and validate design iterations with 13 participants; final prototype achieved a 94.5 System Usability Scale (SUS) score.

**Reverb – Music Retail Self-Service Kiosk** | *UX Research & Design* Jan 2025 - Mar 2025

- Collaborated across a 5-person team throughout user research, ideation, prototyping, and usability testing to design a self-service kiosk for improving the in-store music shopping experience.
- Synthesized customer and staff interview findings to identify key pain points around product discovery, staff availability, and overwhelming product options, informing core design requirements.
- Analyzed usability testing results and developed findings and design recommendations, identifying issues with product comparison, similar-item discovery, staff requests, and product-location visibility; recommended iterative interface improvements to address these usability issues.

**Field Museum Information Architecture Redesign** | *UX Research & Information Architecture* Sep 2025 - Nov 2025

- Performed task-based heuristic analysis and developed a content inventory to identify navigation, labeling, and information-architecture issues across the Field Museum's mobile website.
- Analyzed card-sorting and tree-testing results across multiple testing rounds, using findings to iteratively refine navigation categories, labels, and the site map.
- Collaborated on sitemap redesign, improving tree-test success for exhibition discovery from 70% to 90% and research-resource discovery from 30% to 60%.

**Brave Space Alliance Website** | *Usability Research* Jan 2026 - Mar 2026

- Conducted a cognitive walkthrough and heuristic evaluation to identify information architecture, navigation, and interaction issues.
- Applied think-aloud protocols, behavioral observation, task-success metrics, and surveys during 5 remote usability testing sessions, rotating facilitator, observer, and evaluator roles within a 3-person research team.
- Synthesized quantitative and qualitative findings with the research team to identify task-level issues and develop recommendations for improving volunteer sign-up, donation, and support-group flows.

## PROFESSIONAL EXPERIENCE

**Operations Assistant** | **Seams**, Tailor Shop Aug 2024 - Present

- Coordinate customer orders and daily workflows from intake through completion, maintaining accurate records, timelines, and priorities.
- Communicate customer requirements to the tailoring team and resolve order or scheduling issues in a fast-paced environment.

## CERTIFICATIONS

**CITI Program Certified – Human Subjects Research (SBE)**, Depaul University | *Valid through Jan 2029*
**Microsoft Excel – Excel from Beginner to Advanced**, Udemy | Certificate of Completion, 2024
